Education

Vivekanand Education Society's Institute of Technology **2023 – 2025**
Master of Computer Applications - CGPI 8.34 *Chembur, Mumbai*

Vikas College of Arts,Commerce and Science **2019 – 2022**
B. Sc. Information Technology - CGPA 8.57 *Vikhroli, Mumbai*

Technical Skills

Programming Languages: Python, SQL
Frameworks & Libraries: Django REST Framework, FastAPI
Databases & Messaging: MySQL, MongoDB, Redis, SQLAlchemy, Kafka, OpenSearch
Cloud & DevOps: Git, GitHub, Jenkins, Docker, AWS (S3, EC2, EKS)
Tools: Jira, Postman, Prometheus, Grafana, Celery

Experience

GrayQuest Finance **January 2025 – Current**
Jr. Backend Developer *Mumbai, Maharashtra*

- Developed and owned the Admin backend with **50+ RESTful APIs** using Django REST Framework and SQLAlchemy, with **JWT** and **API-key** inter-service authentication; owned **multiple repositories** across the codebase.
- Implemented **Kafka producer-consumer** logic for async bulk data APIs, eliminating daily manual script runs by the operations team and enabling large-scale tasks **80% faster**.
- Configured **Celery** with **AWS SQS** as the message broker to handle **scheduled and background jobs**, decoupling long-running tasks from the request cycle and improving overall system responsiveness.
- Implemented **Redis caching**, **rate limiting**, and **request throttling**; optimized query performance reducing response time from **800ms to 120ms** (**85% improvement**).
- Refactored legacy monolith into **FastAPI/Django microservices**, improving concurrency and enabling horizontal scaling.
- Integrated third-party APIs with **webhook handling** and **circuit breaker patterns** ensuring **99.5% uptime**.
- Researched and implemented **OpenSearch** for centralized audit logging across services, replacing ad-hoc logs with a **structured dashboard** for real-time audit trail visibility.
- Built an internal **Python audit library** standardizing audit API call logic, reducing redundant service calls and improving consistency across teams.
- Shipped an **auto lead assignment service** automating end-to-end lead routing in the backend, replacing a previously manual daily process.
- Monitored system health using **Prometheus** and **Grafana**, reducing critical downtime incidents by **50%**.

Sunrise Infotech Pvt Ltd **April 2022 – December 2022**
SDE - Intern *Mumbai, Maharashtra*

- Worked on a notification system to send alerts via email and SMS, ensuring timely communication with users.
- Optimized MySQL queries, resulting in up to **25% faster** API response times and improved database performance.
- Collaborated with cross-functional teams in an agile environment to support feature development and bug fixes.

Projects

TaskMate - Web App | Python, Django REST Framework, HTML, CSS, JavaScript

- Built a full-stack task management app with **RESTful APIs**, **JWT authentication**, task filtering by status and due date, and a JavaScript frontend for user interaction.
- Implemented user authentication via JWT, CRUD operations, and SQLite for local development with Git for version control.

Discover - App | Android, Java, Firebase

- Built a college-level social media platform enabling students to post blogs, photos, and videos related to campus events, boosting student interaction and participation.
- Integrated **Firebase** for real-time data sync, storage, and user authentication; designed intuitive UI with XML layouts.
- Implemented modular architecture with student and admin roles — supporting content creation, review, and approval, ensuring moderated and relevant posts.

Leadership / Extracurricular

- Student Placement Coordinator, VESIT.
